

## The new Universal Balun from DXpatrol

1:1      1:2      1:4      1:9

Yes we have made it !

With this new Universal Balun from Dxpatriol you can easily change from

1:1, 1:2, 1:4 and 1:9

All you need to do is select the connections following the table scheme

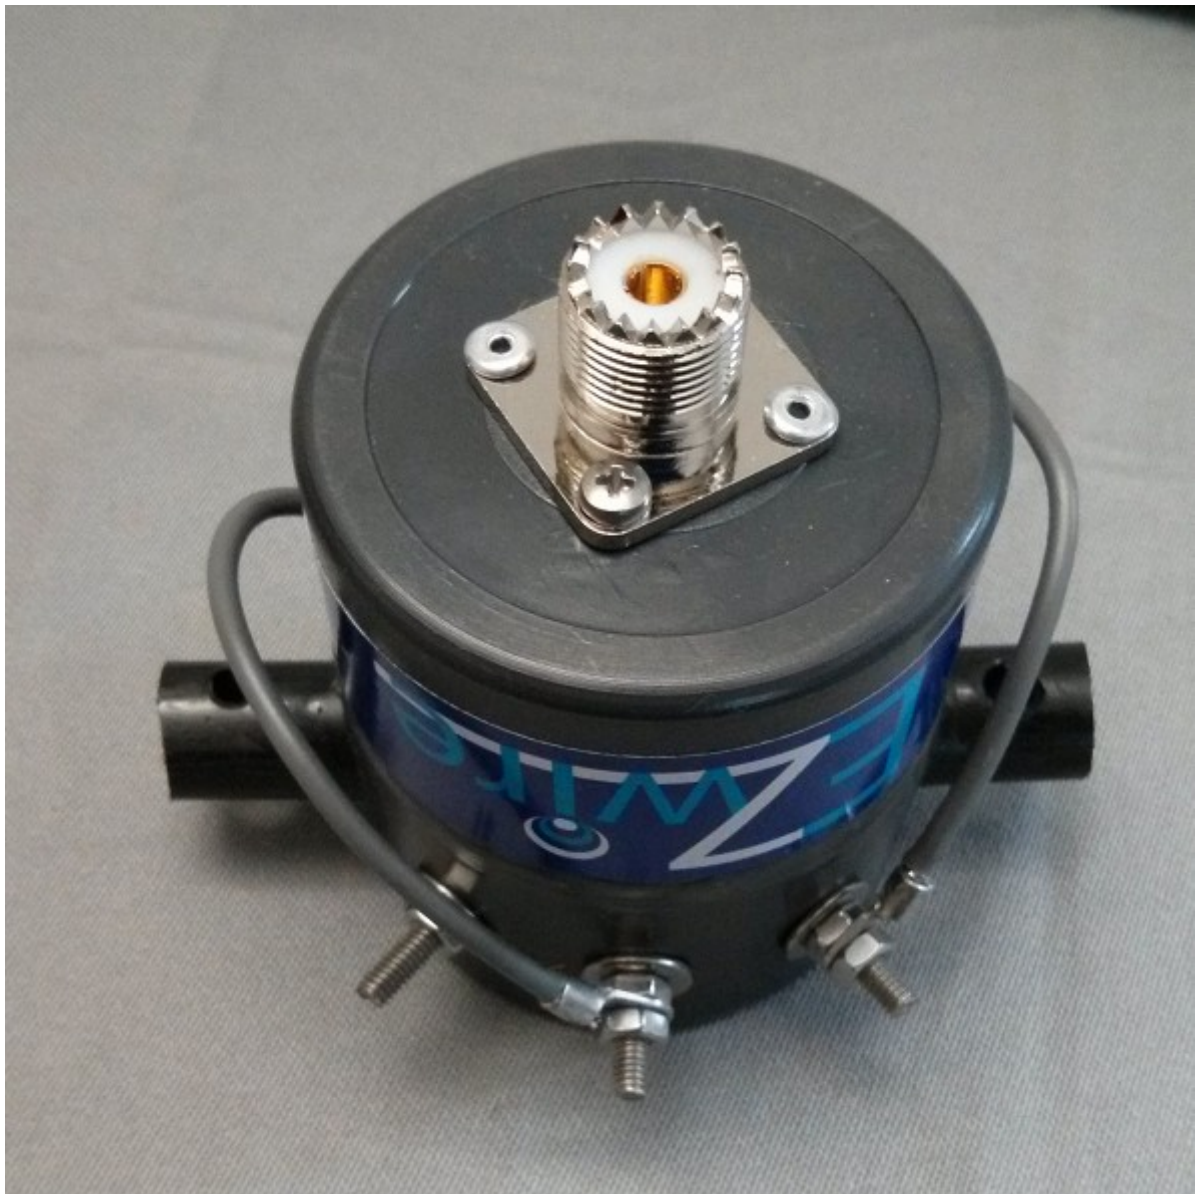

This Balun is 600W Power for SSB/CW and 200W for Digital Modes.

Continuous coverage from 160m to 10m.

You can now make all you tests in the field on your antenas and use this universal Balun in all kind

of antenas.

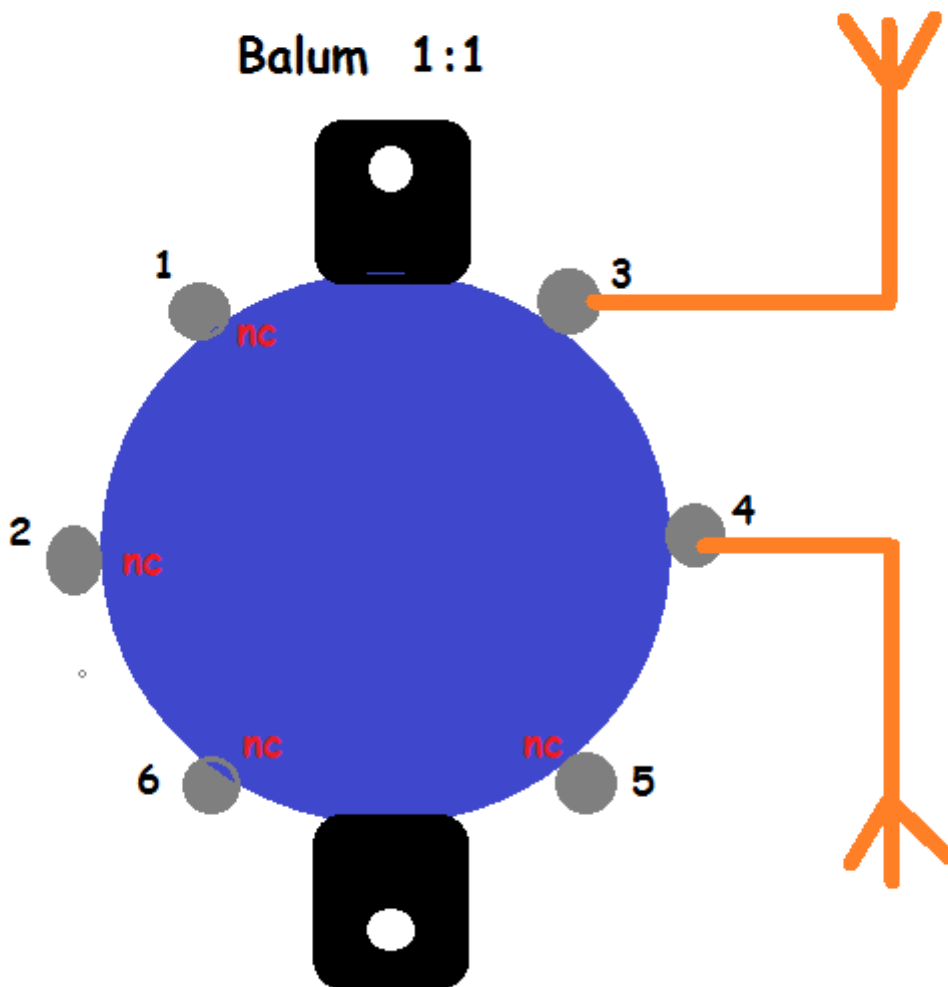

Delta-Loops—Windom--G5RV--Dipoles--LongWires--End-Feed--Verticals--Skyloops--etc
